**WEST CHESTER, PA (December 17, 2019)** – For the third consecutive year, Food Logistics Magazine has named Testo North America to its Top Software and Technology Providers list.

The annual FL100+ Top Software and Technology Providers list serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

“We are honored to be recognized again by Food Logistics as a vital technology resource for the industry,” says Michael Ficacci, Director of Marketing for Testo North America. “We are committed to providing solutions that enable organizations to provide safe and high-quality food while optimizing operational efficiency.”

“Whether you’re using sensors to monitor critical temperatures for perishables or a WMS to manage inventory flows in your warehouse, software and technology are playing a vital role in the food and beverage industry,” remarks John R. Yuva, editor for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. “The transparency and safety of the digital global food supply chain would not exist without innovations in software and technology. Our FL100+ recipients help drive supply chain compliance and regulatory changes that benefit everyone from the farmer to the food processor to the consumer.”

This year’s list can be found in the November/December 2019 issue of *Food Logistics*, as well as online at [www.foodlogistics.com](http://www.foodlogistics.com).
