FOR IMMEDIATE RELEASE

**Testo North America's Eric Moore appointed chair of  
AFFI Foodservice Training and Education Working Group**

**WEST CHESTER, PA (November 13, 2018)** – Eric Moore, Director of Food Safety and Regulatory Compliance for Testo Solutions USA, Inc., has been appointed chair of the American Frozen Food Institute's (AFFI) newly established Foodservice Training and Education Working Group.

"AFFI is very excited to have Eric Moore ready to lead the way in our new Foodservice Training and Education Working Group," said Dr. Donna Garren, Executive Vice President of Science and Policy for AFFI. "We are looking forward to seeing the depth and quality of the work that this accomplished group of professionals is able to achieve over the next year."

The working group will meet a total of four times over the next 12 months to discuss ways to institute and enforce best practices in the foodservice industry. As chair, Moore will have the opportunity to lead these discussions and use his own experience and expertise to guide the work being done.

"I am looking forward to working alongside the members of the working group as we discuss and develop best practice guidelines for the food service industry," Moore said. "It promises to be a great opportunity for everyone to grow, learn and share best practices from colleagues and their respective experiences in the industry."

The American Frozen Food Institute is a national trade association dedicated to promoting the interests of all segments of the frozen food industry. The first meeting of its new Food Safety Best Practices working group will be held on November 14-15, 2018 in Washington, DC.

**Testo North America:** Testo North America is a leader in the design, development, and manufacture of portable measurement instrumentation. With the launch of a fully integrated system (Hardware/Software/Services) focused on fulfilling the compliance gap, the testo Saveris system leads the food safety market into a new era. Executives can now automate checks, create visibility and improve accountability. testo Saveris changes the dynamic from manual, paper-based reporting to automated exception management through software notifications.
