FOR IMMEDIATE RELEASE

**Testo Solutions USA, Inc. Launches testo Saveris Quality Management System**

**WEST CHESTER, PA (August 17, 2017)** – Testo Solutions, world leader in measurement technology and quality management systems, announces the launch of the testo Saveris platform, the industry’s most integrated food safety and quality management solution. By combining flexible measurement technology with intuitively operated software and customized service, testo Saveris supports compliance and quality in the day-to-day food industry workflows.

The Saveris solution helps food providers reduce reliance on paper and maximize efficiency through digital record keeping. Employees are guided through quality procedures systematically with a lightweight tablet and innovative measuring instruments. Multifunctional tools enable employees to capture data across a wide range of functions including temperature monitoring, cooking oil quality, sanitation checks and more. All instruments report data to the Testo cloud via Bluetooth or Wi-Fi which allows for access anytime, anywhere. The testo Saveris platform’s on-going service package provides customer support from planning and installation to support, calibration and program management.

Eric Moore, Director of Food Safety and Regulatory Compliance for Testo Solutions, notes the ever increasing importance of managing safe food handling practices, having visibility of the compliance to those practices, and quickly adapting and improving for food providers.

“In the fast-paced and demanding food industry, having the ability to ensure that customers consistently receive safe, high quality products is an essential ingredient to an organization’s long terms success,” he says. “The testo Saveris platform provides organization-

wide visibility of a company's quality and food safety procedures while managing corrective actions and implementing updates seamlessly. All factors which, at the end of the day, support the success of the business. ”

Testo develops and manufactures software platforms and measurement instrumentation in-house with no reliance on third-party partnerships, and the solution is configurable to meet the unique demands of each customer.

###

**Testo Solutions USA, Inc.**

For decades, Testo's measurement instruments and solutions have been indispensable over the entire food process flow.
