FOR IMMEDIATE RELEASE

Testo Solutions Welcomes Claudio Bauza to Sales Team

WEST CHESTER, PA (June 8, 2018) – Testo Solutions USA, Inc. is excited to welcome Claudio Bauza as Director of Business Development for Restaurant Solutions.

In his new role, Bauza will be responsible for sales activities and revenue generation for Testo’s digital quality management system, testo Saveris Restaurant. He will work with food service organizations to help them realize the full potential of their food safety programs with the testo Saveris system, configured based on the unique needs of the customer.

Bauza brings over 20 years of experience in dynamic account management and marketing roles to Testo. His past involvement in the food industry reaches across a variety of segments, including food service, retail and manufacturing. Bauza will utilize his industry expertise to develop and maintain strong relationships with consumers in the food service and restaurant categories.

“Claudio brings substantial business development experience to our food solutions team,” says Patrick McGrath, VP of Solutions Sales and Marketing at Testo. “His proven abilities to develop and nurture relationships in the food industry will drive growth within the organization and provide value to our customers.”

###

About Testo Solutions USA, Inc.

Testo Solutions USA, Inc. is a world leader in the design, development, and manufacture of portable test and measurement instrumentation. Backed by 60 years of measuring engineering

experience, our mission is to provide the best quality, service, and value in the industry. With the launch of a fully integrated system (Hardware/Software/Services) focused on fulfilling a gap for automation and compliance, the testo Saveris system leads the food safety market into a new era. Food safety executives can now automate many of today's manual food safety checks; create visibility across the business to improve accountability; and provide leadership with sought-after tools to control food safety risks. The Saveris system changes the dynamic from managing paper, updating binders, and manually reporting progress up the chain to automation and managing exceptions through software notifications to improve food safety and lowering risk.
