

The thermal imagers testo 872 and testo 885 for building thermography.

- Detect building faults and energetic weak spots
- Eliminate pinpointed problems
- Improve energy efficiency sustainably

Your advantages with the thermal imager system from Testo

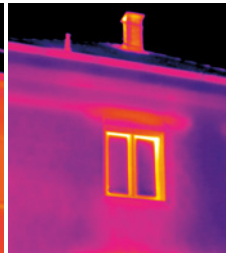

Everything reliably in view

Testo humidity image:
Evaluate mould risk according to the traffic light principle.

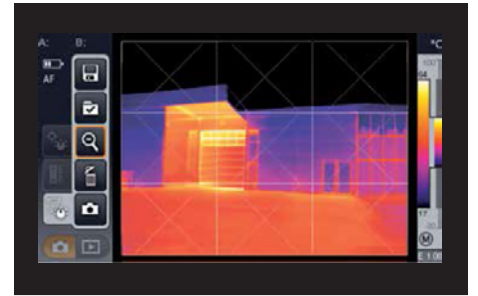

WITHOUT testo ScaleAssist

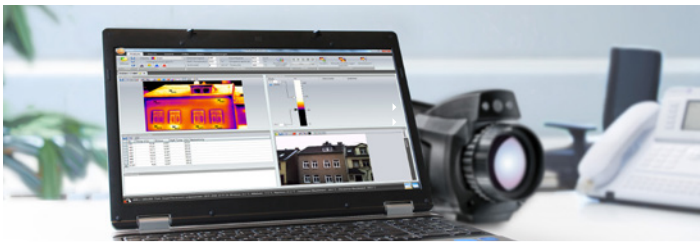

WITH testo ScaleAssist

testo ScaleAssist:
Optimum contrast settings.
Fully automatically.

Panorama image function:
Present large buildings in detail
in one image.

Complete documentation

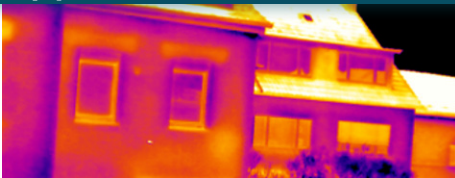

Thermography software testo IRSOFT:
Extensive analysis functions
and report templates.

testo Thermography App:
Stream thermal images to tablet/smartphone:
Ideal for convincing customers.

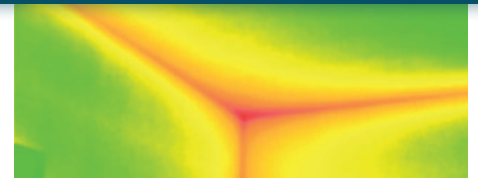

Applications

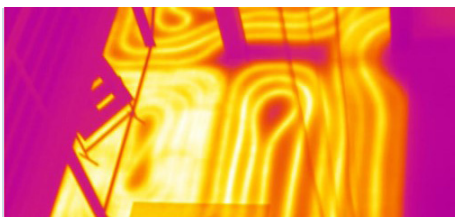

Analyzing building shells.

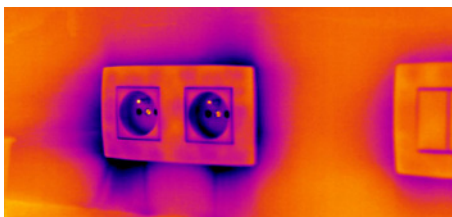

Detect cold bridges.

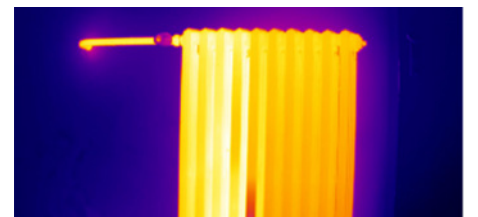

Identify mould risk.

Localizing leaks
(pipelines, underfloor heating).

Ensure quality
in new builds and renovations.

Check heating systems
for silting.
